Outputs		Verification Status update, Verified Landlord Badge and Notification.		

Requirement	3	Requirement	Landlord Leasing Request and Application View	
No:		Name:		
Introduction		The Leasing Req	uest and Application View enables landlords to view	
		student applicat	ions and manage leasing requests for their listed	
		properties on TUSH.		
Inputs		Student name, c	ontact info, student ID, move-in date, rental	
		duration, proof	of income, guarantor information, Rental history	
		(optional). Prope	erty Listing information (rent amount, availability	
		date, utilities).		
Description		Landlord Leasing	g Request and Application Review must be	
	completed for making listing application to TUSH.			
		A Landlord Leasing Request and Application Review shall be allowed		
		if and only if:		
		-The system must allow landlords to authenticated student details		
		-The system must ensure the property listing information is always available		
		-The system must allow students to submit application		
		- The system must allow landlords to view all applications submitted		
	-The system must allow landlords to view a detaile			
		applicant.		
	-The system must allow landlords to filter and search student			
		applications.		
Outputs		Application List,	Application Status Updates, Applicant profiles,	
		Lease agreemen	t, Feedback to applicants.	

Requirement	4	Requirement	Landlord Individual Application Review, Approval	
No:		Name:	and Rejection	
Introduction		The Individual Application Review, Approval and Rejection allows landlords to review and approve or reject individual student applications for their properties on TUSH		
Inputs		Student application details (full name, contact info, Towson University student ID, proof of income, bank statements, guarantor details, references, rental history), Landlord evaluation criteria (Student ID), and Application status inputs (approval, rejection, or requests for additional information).		
Description		requests for additional information). Landlord Individual Application Review, Approval and Rejection must be completed for making listing application to TUSH. A Landlord Individual Application Review, Approval and Rejection shall be allowed if and only if: -The system must provide landlords with the ability to view detailed application for each applicant -The system must provide a review dashboard allowing landlords to review applications for each applicant -The system must allow landlord to compare the student's application against criteria. - The system must allow landlords to update the status of each application -The system must allow landlords to request for additional information from each applicant. -The system must allow landlords to filter each student applications. -The system must allow landlords to Accept or Reject application.		
Outputs		Application Review Dashboard, Application Status Updates, Request for Additional Information and Lease Agreement Generation and Notification.		

Requirement	5	Requirement	Student Housing Search	
No:		Name:		
Introduction		The Student Housing Search allows students to search for available		
		rental properties listed by landlords on the TUSH platform.		
Inputs		Location, Proper	ty Type, Amenities, Price Range, Number of	
		Bedrooms/Bathr	rooms, Move-in-Date, Lease Duration and Distance	
		from School.		
Description		Student Housing Search must be completed for making listing application to TUSH.		
		A Student Housi	ng search shall be allowed if and only if:	
		-The system mus	st allow students to perform basic search for	
		available properties by entering keywords or selecting a location		
		-The system must allow students to perform an advanced search by		
		applying multiple filters, such as price range, number of rooms of		
		-The system must allow students to sort search results by criteri		
		such as price		
	 The system must allow students to view available properties of map, with pins indicating the locations of properties 			
	-The system should allow students to save searches based on t filter preferences			
		-The system sho	uld allow students to mark properties as favorites	
	for easy access later			
		-The system should ensure AI/ML is used to enhance a good search experience		
Outputs		•	Detailed Property View, Favorites List, Map View,	
<u> </u>		Notification and	• • • • • • • • • • • • • • • • • • • •	

Requirement	6	Requirement	Roommate Matching System	
No:		Name:		
Introduction		The Roommate Matching System will allow for students to match		
		with other students based upon lifestyle information provided to		
		TUSH.		
Inputs			Information, like name, age, lifestyle preferences	
		•	ating/sleeping/working/social habits, if the student	
		already has prop	•	
Description			Matching System will allow students to be able to	
		•	ne another in order to become roommates in a	
			ey will be leasing.	
			atching Search and Connection should be allowed if	
		and only if:		
		•	st allow for students to be able to apply multiple	
		filters to search for specific roommates based upon filters like age name, certain lifestyle habits		
		-	uld allow for saving filter preferences for ease of	
		search		
			uld give recommendations based upon saved filters	
		•	uld provide a search history	
		•	st allow for students to view each other's profiles	
		-The system sho	uld allow for students to contact one another, i.e. by	
	allowing for access to their contact information			
		-The system should allow students to add each other and approve the add to become roommates		
		- The system sho	ould ensure AI/ML is used to support roommate	
		matching based	on students' preference	
Outputs		Added Roommat	tes, Favorited Filters, Search Results, Possible	
		Roommate Infor	mation, Contact Information	

Requirement	7	Requirement	Students accessing Towson University resources	
No:		Name:		
Introduction		A verified user should be able to access Towson University		
		Resources through the system, being able to check things like		
		dining information, fitness information, shuttle information,		
		parking informa	tion.	
Inputs		System Account	Information, Verification via Towson Login,	
		searching for To	wson Resources	
Description		A user verified T	owson University student can search for basic	
		Towson resource	es that would be useful for planning living	
		conditions.		
		Towson University Resources can be accessed by the application		
		if and only if:		
		-The user is logged in and verified as a Towson University Student		
		-The system must provide basic information based on the Towson University resources the user is accessing		
		-The system must provide information only relevant to possible		
		decisions for living conditions		
		-The system should allow for ease of returning to their		
		Dashboard after	accessing resources	
_				
Outputs		_	and costs, Shuttle times and pickup locations,	
			les and costs, fitness information, library	
		information, red	lirects to Towson University's official site	

Requirement	8	Requirement	Students accessing local public transport	
No:		Name:	information	
Introduction		A verified student should be able to check local transport		
		information, for	example, like the MTA. The student can see	
		pickup times, routes, pickup and drop off locations, delays.		
Inputs		Location, Public	Transport Name, Type of Public Transport,	
		Account Informa	ation, Towson University Verification	
Description		A verified Towso	n University Student can search for local public	
		transport inform	nation.	
		The Local Public	Transport Information can be accessed if and	
	only if:			
		-The student is logged in and verified to be a Towson University		
		Student		
		- The system must allow for the user to apply filters based upo		
		the name of the public transport, the type of public transport,		
		the times they pick up and drop off, where each public transport		
		picks up and drops off		
		-The system must allow for redirects to available websites for the		
		public transport -The system should make recommendations based upon		
		affiliations with	Towson University	
Outputs		Delay Information	on, Pickup Times and locations, routes, public	
		transport names	s and types	

Requirement	9	Requirement	Students Carpool listing	
No:		Name:		
Introduction		Students should be able to create a carpool only accessible by those who are logged in to the system, providing information such as departure times, arrival times, destination, and meetup location. Students can then search for these and possibly flag that they will be joining the carpool.		
Inputs		Student Account Information, Towson University Verification, Departure/Arrival Times, Destination, Meetup Location, Flagging to Join, amount of people allowed in the carpool		
Description		students can according Student Caronly if: -The student crestudent -The students violated Students -The system must arrival times, de can join the carpethe system must odeny/remove -The system sho is attending a caronly caronly a caronly a caronly a caronly system sho is attending a caronly system according a caronly system sho is attending a caronly system sho is attending a caronly if:	st allow for students to join the carpool st allow for the student who created the carpool students from the carpool uld make a recommendation when a roommate	
Outputs		Generation of Ca	enials for Carpool, Added/Removal from Carpool, arpool, Deletion/creation of a carpool, ns for carpool, carpool searches
